"Reseña del editor This completely new title is written to
specifically cover the new IB Diploma Mathematical Studies
syllabus. The significance of mathematics for practical
applications is a prominent theme throughout this coursebook,
supported with Theory of Knowledge, internationalism and
application links to encourage an appreciation of the broader
contexts of mathematics. Mathematical modelling is also a
key feature. GDC tips are integrated throughout, with a
dedicated GDC chapter for those needing more support.
Exam hints and IB exam-style questions are provided within
each chapter; sample exam papers (online) can be tackled in
exam-style conditions for further exam preparation. Guidance
and support for the internal assessment is also available,
providing advice on good practice when writing the project.
