Today more than 100 small, asymmetric, and revolutionary wars are being waged around the world. This book provides invaluable tools for fighting such wars by taking enemy perspectives into consideration. Using case studies, Manwaring outlines vital survival lessons for leaders and organizations concerned with national security in our contemporary world. The insurgencies Manwaring describes span the globe. Beginning with conflicts in Algeria in the 1950s and 1960s and El Salvador in the 1980s, he goes on to cover the Shining Path and its resurgence in Peru, Al Qaeda in Spain, popular militias in Cuba, Haiti, and Brazil, the Russian youth group Nashi, and drugs and politics in Guatemala, as well as cyber warfare. Large, wealthy, well-armed nations such as the United States

have learned from experience that these small wars and insurgencies do not resemble traditional wars fought between geographically distinct nation-state adversaries by easily identified military forces.

Twenty-first-century irregular conflicts blur traditional distinctions among crime, terrorism, subversion, insurgency, militia, mercenary and gang activity, and warfare. Manwaring's multidimensional paradigm offers military and civilian leaders a much needed blueprint for achieving strategic victories and ensuring global security now and in the future. It combines military and police efforts with politics, diplomacy, economics, psychology, and ethics. The challenge he presents to civilian and military leaders is to take probable enemy perspectives into consideration, and turn resultant conceptions into strategic victories. The book is published by University of Oklahoma Press..
