"Pressestimmen Collins tells what his space journeys meant to him as a human being [and] discusses the role of man amid the multitudinous mechanical marvels . . . Profoundly affecting (The New Yorker)Michael Collins can write . . . No other person who has flown in space has captured the experience so vividly (The New York Times Book Review)A splendid and affirmative book . . . A magnificent piece of exposition alive with humour, candid in its anxiety, very sensitive in its appreciation of the men involved. (The Atlantic Monthly) Werbetext A special updated anniversary edition of the classic account of the Apollo 11 trip to the moon. Buchrückseite **In July 1969, Neil Armstrong, Buzz Aldrin, and Michael Collins piloted the Apollo 11 spacecraft to the moon. Fifty years later, it is still one of the greatest achievements in human history.**In this remarkable memoir, a defining classic, Michael Collins conveys, in a very personal way, the drama, beauty, and humour of that adventure. He also traces his own development from his initial flight experiences in the air force, through his days as a test pilot, to his involvement in Project Gemini and his first spaceflight on Gemini 10. He presents an evocative picture of the famous Apollo 11 spacewalk and a new perspective on time, light, and movement from someone who has seen the fragile Earth from the other side of the moon.Celebrating the 50th anniversary of the moon landing, Carrying the Fire by Michael Collins is the utterly absorbing and truly compelling account of what it was like to be a member of the Apollo 11 mission to the moon. Über den Autor und weitere Mitwirkende Michael Collins was born in Rome in 1930. After graduating from the U.S. Military Academy, he entered the newly independent Air Force, becoming a fighter pilot and experimental test pilot.He was one of the third group of astronauts named by NASA in 1963. On his first mission, Gemini 10, he set a world altitude record and became the nation's third spacewalker. His second flight was as command module pilot of the historic Apollo 11 mission to the moon in July 1969. He is retired major general in the U.S. Air Force Reserve and has received numerous decorations and awards, including the Presidential Medal of Freedom and the Collier Trophy. He is now retired and lives in South Florida. Carrying the Fire is his memoir."
