"Pressestimmen This primer fully deserves to be widely adopted by students (and teachers) of NMR spectroscopy. This book is a complete and very accessible tool for understanding the origin and significance of the basic NMR parameters. * Sabine Bouguet-Bonnet, Universite de Lorraine, J. Appl. Cryst. (2017). 50, 1243 * This book is indisputably a must have for any student, or even teacher, in the field of nuclear magnetic resonance. It is a perfect format for preparing readers for more advanced studies on the topic. Theoretical explanations are illustrated by many examples and applications, and this second edition has been completed with a series of exercises. * Sabine Bouguet-Bonnet, Universite de Lorraine, J. Appl. Cryst. (2017). 50, 1243 * Über den Autor und weitere Mitwirkende **Peter Hore** is Professor of Chemistry at the University of Oxford."
