Ce livre conforme aux nouveaux programmes de 2013 reprend une conception originale imaginée dans l'unique but d'être utile aux élèves. Ce n'est ni un manuel de cours, ni un recueil de problèmes. Pour répondre à la demande des étudiants toujours soucieux d'aller vite et bien à l'essentiel, il embrasse sous forme d'une batterie de questions courtes, de conseils et d'exercices, la totalité du programme de physique et de chimie de première année de BCPST. Il a été conçu dans un double objectif : ponctuellement, préparer efficacement une colle, faire le point sur les connaissances avant un devoir surveillé, entamer sereinement les révisions de fin d'année, qu'il s'agisse du passage de 1re en 2e année ou de la préparation à l'écrit et à l'oral des concours en 2e année ; au quotidien, permettre un travail de fond régulier tout au long de l'année. Il regroupe tout ce qui est indispensable pour réussir à l'écrit et à l'oral et sera donc utile à tous ceux qui ont à coeur de travailler la physique dans l'objectif des concours et de leur formation personnelle. Chacun des 12 chapitres regroupe plusieurs dizaines de questions réparties en rubriques : Les ordres de grandeur utiles Le cours d'abord Conseils à suivre ; erreurs à éviter Applications directes du cours Questions de réflexion ; physique pratique Exercices Travaux pratiques (selon les cas) Bien sûr chaque chapitre « questions » est suivi de son chapitre « réponses », entièrement rédigé et reconnaissable à sa marge grisée sur le côté droit. Si la forme de cet ouvrage reste à l'heure actuelle originale, le fond bénéficie de l'expérience de ses auteurs, à la fois enseignants en classes préparatoires et membres de jurys de concours..
