"Über den Autor und weitere Mitwirkende Dr. Illes is Professor of Neurology and Canada Research Chair in Neuroethics at the University of British Columbia. She is Director of the National Core for Neuroethics at UBC, and faculty in the Brain Research Centre at UBC and the Vancouver Coastal Health Research Institute. She also holds affiliate appointments in the School of Population and Public Health and the School of Journalism at UBC, and in the Department of Computer Science and Engineering at the University of Washington in Seattle, WA, USA. Dr. Illes' research focuses on ethical, legal, social and policy challenges specifically at the intersection of the neurosciences and biomedical ethics. This includes studies on stem cells and regenerative medicine, functional neuroimaging in basic and clinical research dementia, addiction, neurodevelopmental disorders and the commercialization of cognitive neuroscience. Barbara J Sahakian is Professor of Clinical Neuropsychology at the University of Cambridge Department of Psychiatry, and the Medical Research Council/Wellcome Trust Behavioural and Clinical Neuroscience Institute. She is also a Clinical Psychologist. She has an international reputation in the fields of cognitive psychopharmacology, neuroethics, neuropsychology, neuropsychiatry and neuroimaging. She is co-inventor of the CANTAB computerised neuropsychological tests, which are in use world-wide. She is probably best known for her research work on cognition and depression, cognitive enhancement using pharmacological treatments, neuroethics and early detection of Alzheimer's disease. She has over 300 publications covering these topics in various scientific journals. Her current programme of research, investigates the neurochemical modulation of impulsive and compulsive behaviour in neuropsychiatric disorders, such as unipolar and bipolar depression."
